

DOZOR

Your night shift on the markets

A trading bot being engineered, rule by rule, to become the most disciplined on the internet. This is how he will work for you.

A watchman, not a gambler.

Dozor is the owner's personal trading bot. He is not available to the public yet, but will be in the near future. When he opens, three promises come with him.

PROMISE 01

Your money stays yours

He connects to your own exchange or broker account with trade-only keys. He can place and close trades. He can never withdraw.

PROMISE 02

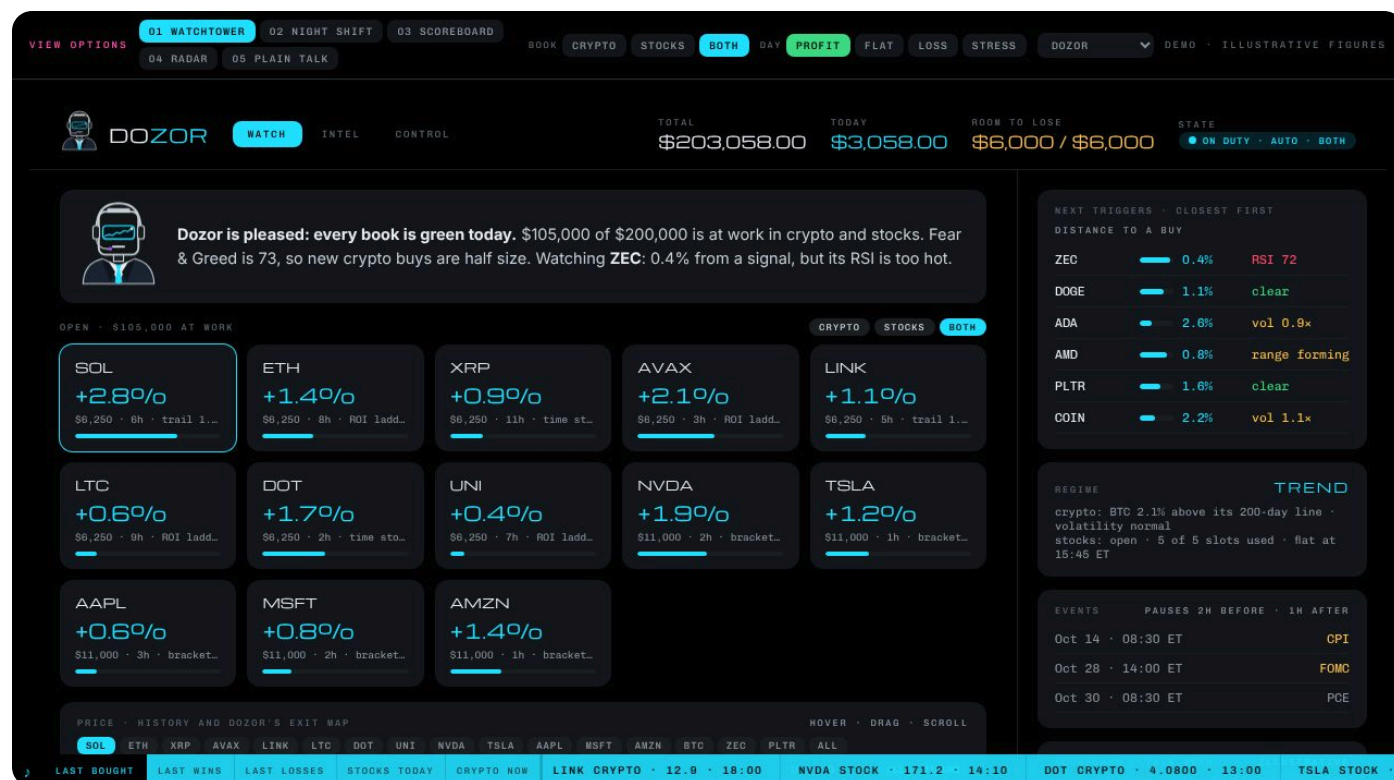

Every trade protected

Each position carries a stop that sits at the exchange, so it still fires if a server goes quiet at 3 a.m.

PROMISE 03

Reports you can read

A live console in five views, a watch room on your phone that answers in real time, and a short night-shift report.

The Watchtower view of the Dozor console. Figures shown are illustrative.

Three steps. Then he keeps watch.

01

Connect
Link your exchange or broker with trade-only keys. Nothing moves to us.

02

Choose your watch
Each package is a risk profile, set from models tested against real market history.

03

Watch him work
Console, phone alerts and a daily report. Pause him any time.

110+
exchanges and brokers worldwide
he can be connected to

SOURCE	VENUES
Crypto exchanges (CCXT library)	104
Stock and futures brokers (Lumibot)	6
Robinhood Crypto (official API)	1
Alpaca counted in both lists	-1
Unique venues	110

Every venue is tested before it goes live. Some exchanges are not open to US residents.

Four ways to have him on duty.

A flat monthly fee. No share of your profits, no signals to buy.

WATCH

Free

- Daily night-shift report
- Live watch window, read only
- Phone alerts, read only
- Console demo, all five views

NIGHT SHIFT · MOST POPULAR

Price at launch / month

- Both bots on your own account
- A stop on every trade, at the exchange
- Daily room-to-lose cap
- Full console and commands from your phone

FULL WATCH · BIGGER BOOKS

Price at launch / month

- Everything in Night Shift
- More open positions at once
- Weekly review with the studio
- First access to new strategies

DESK · TEAMS

Talk to us

- Several accounts, one console
- Your own rules, tested first
- Private deployment

Built-in safeguards on every paid watch: a stop on every trade, a daily loss limit, an automatic pause after a deep drawdown, stocks flat before the close, and quiet hours around major economic news.

Prices are set at launch. Package contents may change before the public release.

THE SYSTEM

Many signals. One discipline.

He acts only when the market agrees with itself.

Before you ask.

Can I use Dozor today?

Not yet. He is going through rigorous machine learning and testing, and opens to the public in the near future.

How does he reach me?

He messages your phone the moment something happens, and takes your commands from anywhere, as long as your phone is close.

How does he decide?

He reads the market from several angles at once and acts only when they agree. You see every trade, stop and report.

Will he hold my money?

No. Your funds stay on your exchange or broker. His keys can trade, never withdraw.

What does he trade?

Crypto around the clock and US stocks during market hours, in one console.

Who built him?

Domus Design Studio designed and built his brand, console, watch room and this brochure.

Hear the day he opens.

Leave your email on the Dozor showcase page. One note, on launch day.

thedomusstudio.com

Trading involves risk, including the loss of money you invest. Past results and tests do not guarantee future results. Dozor follows rules; markets can still fall. Nothing in this brochure is financial advice.
